JRE ELECTRONIC MANUFACTURING
3000 -11 N.W. 25th Ave.
Pompano Beach, FL. 33069

Attn: Mr. James Smeriglio;

It has now been six months since Stanton/KRK has been producing our quality line of speakers in our Boynton Beach, Florida location. In that time, we have developed several new relationships with suppliers like JRE, Inc., that has enabled us to double our production output in such a short period of time.

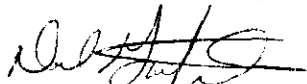

Without the support of quality suppliers like JRE, Inc., we could not have achieved our goals. You have supplied us a top quality part, on time, with little or no rejects due to workmanship. Of the more than 7500 boards you have supplied us thus far, the number of rejects due to workmanship is too few to even mention.

You and your full staff should be extremely proud of the excellent job you have done; we look forward to a long and successful relationship.

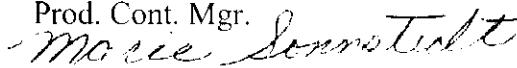

If we had more suppliers like JRE, Inc., our success would be guaranteed.

We at Stanton Magnetics/KRK would like to extend our sincere wishes to all of you at JRE, Inc. for a safe and Happy Holiday Season.

With all our thanks,

Dave Gottfried
